The Kavli Nanoscience Institute at the California Institute of Technology invites applications and nominations for Prize Postdoctoral Fellowships in Nanoscience.

This fellowship program has been established to offer scientists, typically within a few years after receipt of the PhD degree, the opportunity to pursue new and innovative research at the frontiers of nanoscience and engineering. In this open competition, strong preference will be given to applicants who propose experimental research in interdisciplinary areas of nanoscience. In the process of applying and developing a research plan, it is encouraged that applicants get in touch with faculty at Caltech with whom they would be interested in working. This appointment is contingent upon completion of all of the requirements for a PhD degree.

The Fellowships are to begin in Fall 2016 and are for a two-year duration. They carry an annual salary of $70,000 and come with a small research fund and relocation costs.

Please apply on-line: www.kni.caltech.edu/pdsearch and upload materials to include curriculum vitae, publication list with refereed publications clearly marked, and a statement of research plans. Three letters of recommendation should also be uploaded.

Applications will be accepted until 5 pm PST on Monday, November 30, 2015
